UDP forwarder

UDP forwarder module allows to forward data received from specific UDP port.

Implementing class: `com.arrow.selene.device.udp.udpforwarder.UdpForwarderModule`

OS dependency: None

Requirements: None

Properties:

Name	Data type	Unit of measurement	Valid values	Default value	Description
deviceAddress	string	N/A	*<hostname or IP address>*	N/D	Defines address to which received data should be forwarded
devicePort	integer	N/A	1-65535	N/D	Defines UDP port to which received data should be forwarded
allowPublishLocal	boolean	N/A	true/false	false	Defines if device can be used for data forwarding
address	string	N/A	*<IP address>*	0.0.0.0	Defines address of network interface to be used to listen data
port	integer	N/A	1-65535	N/D	Defines UDP port to be used to listen data
